

## Context

Every term our scrutiny and discussions regarding student achievement provides an indication of just one area of progress being made by our students. Of course, progress for our learners is multifaceted and our conversations between class teacher and pathway leads is crucial for understanding the story behind the data.

Year on year comparisons is not always useful but provides a ball park indication. Last spring of course was considerably disrupted by COVID and lockdowns so we saw an achievement rate of 26%, however, we quickly recovered and rose to our usual levels of approximately 88%.

This term has seen an achievement rate of 92% achieved or exceeded which is encouraging. This is in a backdrop of higher than usual teacher absences.

All targets marked as achieved or exceeding require at least 3 pieces of evidence to confirm this is the case, this can include photographs, video's or witness statements.
